

## 700701 Ultimate Footfit + Low

Premium insole with long-lasting arch support. The ergonomic design is developed for exceptional shock absorption, comfort and support for feet requiring light arch support. The integrated ArchCTRL technology provides effective and durable arch support, while the flexible structure of the sole relieves the plantar fascia. The insole is made from breathable, ESD-approved materials – with responsible choices such as GRS-certified foam and bio-based components. ESD approved and PVC-free. The insole can be trimmed for an individual fit. Use the existing insole as a template.
